

# How does Wisconsin do when it comes to access to care and support for infertility?

RESOLVE: The National Infertility Association believes that anyone who struggles to build a family deserves access to all family building options. That's why we've put together this State Fertility Scorecard that tracks how we're doing providing free support and how your state lawmakers are doing providing YOU access to insurance coverage for your care.

## Wisconsin's fertility grade is...

# C

4

Peer led RESOLVE support groups

17

Fertility specialists

172,307

Women in state, regardless of marital status, who have experienced physical difficulty in getting pregnant or carrying a pregnancy to live birth

NO

Law covering fertility treatments and/or fertility preservation

## Thank you for supporting pro-family policies.

### Insurance Mandate Exceptions

- Experimental fertility care services, monetary payments to gestational carriers or surrogates, or the reversal of voluntary sterilization undergone after the covered individual successfully procreated with the covered individual's partner are not covered
- Does not require religious organizations to provide coverage
- Employers who self-insure or who have fewer than 50 employees are exempt from the requirements of the law
- Employers who self-insure are exempt from the requirements of the law

### How was each state's grade determined?

The following criteria was reviewed and scored to identify a final grade of A through F:

- Number of volunteer run, peer led RESOLVE support groups in state (as of January 1, 2020)
- Number of physicians specializing in reproductive endocrinology at SART-accredited fertility clinics
- Number of women in state who have experienced physical difficulty in getting pregnant or carrying a pregnancy to live birth. Source: National Survey of Family Growth (2015-2017) and 2010 US Census
- Insurance mandate information in each state evaluated against the RESOLVE Model Insurance Benefit which has been vetted and approved by physicians, attorneys, and patient advocates
